

The diagram consists of two main parts. On the left, a horizontal oval contains the text 'def \_\_init\_\_(self, risks, entered):...'. On the right, a larger rectangle contains the text '\_\_init\_\_' at the top, followed by an oval containing four lines of code: 'self.risks = risks', 'self.enterd = entered', 'self.exited = -1', and 'self.when\_to\_move = -1'. Below the rectangle is the text 'graphs/item'.

```
def __init__(self, risks, entered):...
```

`__init__`

```
self.risks = risks
self.enterd = entered
self.exited = -1
self.when_to_move = -1
```
